(54) Title: POINT-OF-INTEREST DISPLAY SYSTEM

(57) Abstract: A point of interest display system (20) includes an updatable database which interfaces with a microprocessor (50) which receives data from a GPS receiver (40) providing the system with current vehicle location and direction of travel information. A display (26) provides the operator graphic display data information and easily accessible control switches (24) allow the operator to select upcoming highway exits, categories of points of interests, and points of interest.
